Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

SCARLET FEVER.

See Diphtheria, measles, scarlet fever, and tuberculosis, page 3834.

SMALLPOX.

Delaware Breakwater Quarantine.

Senior Surg. Irwin reported by telegraph that on December 24, 1915, a case of smallpox was landed at Delaware Breakwater Quarantine from the British steamer *George Pyman*, bound to Philadelphia, Pa., from Barcelona, Spain.

Maryland—Salisbury.

Collaborating epidemiologist reported by telegraph, December 23, 1915, that a new focus of smallpox infection had been reported in Maryland, one case of the disease having been notified at Salisbury, Wicomico County, Md.

Minnesota.

Collaborating Epidemiologist Bracken reported by telegraph that during the week ended December 25, 1915, several new foci of smallpox infection were reported in Minnesota, cases of the disease having been notified as follows: Dakota County, Rosemount, 1; Hennepin County, Mound, 1; Redwood County, North Hero Township, 1; Renville County, Beaver Falls Township, 1; Wright County, Woodland Township, 1.

SMALLPOX—Continued.

Porto Rico—San Juan.

Surg. King reported that on November 29, 1915, a case of smallpox, which resulted in death December 7, 1915, was removed in quarantine at San Juan, P. R., from the Spanish steamship *Antonio Lopez* and on November 30, 1915, another case was removed from the same vessel, and on the same day one case was removed from the Spanish steamship *Miguel M. Pinillos.*

Texas—Laredo.

Acting Asst. Surg. Hamilton reported that during the week ended December 11, 1915, 5 cases of smallpox were reported at Laredo, Tex., the infection in 3 of the cases coming from Mexico and in the other 2 cases from the interior of Texas.

Senior Surg. Pierce reported December 21, 1915, that 7 new cases of smallpox were discovered in Laredo, Tex., on the day the report was made, making a total of 12 cases of the disease then under isolation at Laredo.
